MATERIALS SCIENCE & ENGINEERING A

Subject Index of Volume 197

Acoustic emission
indentation and acoustic emission in filtration processed platelet reinforced ceramics 231
Acoustic emission analysis
acoustic emission analysis of the evolution of non-equilibrium dislocation–disclination structure of electrodeposited nickel under load 59
Al/Al_2O_3 composites
strength and fracture toughness of aluminum/alumina composites with interpenetrating networks 19
Aluminium
effect of aluminium on deformation mode and mechanical properties of austenitic Fe–Mn–Cr–Al–C alloys 147
Aluminium alloy 6061
the deformation characteristics of SiC particulate-reinforced aluminium alloy 6061 11
Aluminium alloys
on the formation of necks in an Al–13%Si eutectic alloy L5
Aluminium matrix alloy
microplasticity initiation of aluminium matrix alloy elastically stressed in pure mode III 39
Al–Si–Mg alloy
the deformation and fracture behaviour of an Al–Si–Mg casting alloy 171
Al–Zn–Mg–Cu alloys
comparative hot workability of 7012 and 7075 alloys after different pretreatments 181
Austenitic steel
effect of the grain size on the rate of energy storage during the tensile deformation of an austenitic steel 49

Bauschinger effect
an examination of the mean stress contribution to the Bauschinger effect by neutron diffraction 215

Carbide formation
electrochemical behavior of diamond-reinforced composites 79
Ceramics
fractal character of fracture surfaces and boundary values of toughness in a simple ceramic–ceramic system 109
indentation and acoustic emission in filtration processed platelet reinforced ceramics 231
Coarsening
on the coarsening of the modulated structure during aging of austenitic Fe–Mn–Al–C alloys prepared by the rapid solidification process 223
Creep
predictive models for the creep behaviour of PMMA 251
Creep rupture
prediction of creep rupture of unidirectional carbon fiber reinforced polymer composite 237

Elsevier Science S.A.

Critical energy fracture criterion
prediction of creep rupture of unidirectional carbon fiber reinforced polymer composite 237
Crystallographic slips
simulation of rolling textures of b.c.c. metals considering grain interactions and crystallographic slip on {110}, {112} and {123} planes 31

Deformation
deformation characteristics of IMI685 titanium alloy under β isothermal forging conditions 125
deformation mechanisms and slip transfer in a Ti–44Al–2Mo alloy 133
effect of aluminium on deformation mode and mechanical properties of austenitic Fe–Mn–Cr–Al–C alloys 147
materials processing by simple shear 157
microplasticity initiation of aluminium matrix alloy elastically stressed in pure mode III 39
on the formation of necks in an Al–13%Si eutectic alloy L5
the deformation characteristics of SiC particulate-reinforced aluminium alloy 6061 11
Delivery tube
modeling of liquid metal flow and heat transfer in delivery tube during gas atomization 199
Diamond-reinforced composites
electrochemical behavior of diamond-reinforced composites 79
Dislocation–disclination
acoustic emission analysis of the evolution of non-equilibrium dislocation–disclination structure of electrodeposited nickel under load 59
Ductility
comparative hot workability of 7012 and 7075 alloys after different pretreatments 181
the deformation and fracture behaviour of an Al–Si–Mg casting alloy 171
Dynamic recrystallization
dynamic recrystallization in a thermomechanically processed metal matrix composite 91

Electrochemical behaviour
electrochemical behavior of diamond-reinforced composites 79
Electrodeposited nickel
acoustic emission analysis of the evolution of non-equilibrium dislocation–disclination structure of electrodeposited nickel under load 59
Energy storage
effect of the grain size on the rate of energy storage during the tensile deformation of an austenitic steel 49
Environmental stress cracking
the influence of liquid uptake on environmental stress cracking of glassy polymers 119
Excimer laser irradiation
laser nitriding of iron by excimer laser irradiation in air and N_2 gas L1

Fatigue
neutron diffraction measurements of residual strains in offshore welds 209
Fe–Mn–Al–C alloys
on the coarsening of the modulated structure during aging of austenitic Fe–Mn–Al–C alloys prepared by the rapid solidification process 223
Flexural strength
flexural strength of gamma base titanium aluminides at room and elevated temperatures 69
Fractal concepts
fractal character of fracture surfaces and boundary values of toughness in a simple ceramic–ceramic system 109
Fracture
flexural strength of gamma base titanium aluminides at room and elevated temperatures 69
fractal character of fracture surfaces and boundary values of toughness in a simple ceramic–ceramic system 109
strength and fracture toughness of aluminum/alumina composites with interpenetrating networks 19
the deformation and fracture behaviour of an Al–Si–Mg casting alloy 171

Gas atomization
modeling of liquid metal flow and heat transfer in delivery tube during gas atomization 199
Glassy polymers
the influence of liquid uptake on environmental stress cracking of glassy polymers 119
Grain interactions
simulation of rolling textures of b.c.c. metals considering grain interactions and crystallographic slip on {110}, {112} and {123} planes 31
Grain size
effect of the grain size on the rate of energy storage during the tensile deformation of an austenitic steel 49

Hardness
calculation of characteristic macro-hardness from low-load indentation tests 165
Heat transfer
modeling of liquid metal flow and heat transfer in delivery tube during gas atomization 199
High carbon steel wires
effect of hydrodynamic and roller die drawing on the texture of high carbon steel wires 97
Hot torsion tests
comparative hot workability of 7012 and 7075 alloys after different pretreatments 181
Hydrodynamic drawing
effect of hydrodynamic and roller die drawing on the texture of high carbon steel wires 97

Indentation
indentation and acoustic emission in filtration processed platelet reinforced ceramics 231
Indentation size effect
calculation of characteristic macro-hardness from low-load indentation tests 165
Interlaminar shear
interlaminar shear of woven fabric Kevlar–epoxy composites in three-point loading 113
Interpenetrating networks
strength and fracture toughness of aluminum/alumina composites with interpenetrating networks 19
Iron
enthalpy measurements of undercooled melts by levitation calorimetry: the pure metals nickel, iron, vanadium and niobium 83
laser nitriding of iron by excimer laser irradiation in air and N_2 gas L1
Isothermal forging
deformation characteristics of IMI685 titanium alloy under β isothermal forging conditions 125

Kevlar–epoxy composites
interlaminar shear of woven fabric Kevlar–epoxy composites in three-point loading 113

Lamellar structure
different morphologies of lamellar structure in a γ-phase titanium aluminide 103
Levitation calorimetry
enthalpy measurements of undercooled melts by levitation calorimetry: the pure metals nickel, iron, vanadium and niobium 83
Liquid metal flow
modeling of liquid metal flow and heat transfer in delivery tube during gas atomization 199
Liquid uptake
the influence of liquid uptake on environmental stress cracking of glassy polymers 119
Load
acoustic emission analysis of the evolution of non-equilibrium dislocation–disclination structure of electrodeposited nickel under load 59

Materials processing
materials processing by simple shear 157
Mean stress
an examination of the mean stress contribution to the Bauschinger effect by neutron diffraction 215
Metal matrix composites
dynamic recrystallization in a thermomechanically processed metal matrix composite 91
effects of reinforcement orientation on the tensile response of metal-matrix composites 1
Metal-working
materials processing by simple shear 157
Meyer power law
calculation of characteristic macro-hardness from low-load indentation tests 165
Microplasticity
microplasticity initiation of aluminium matrix alloy elastically stressed in pure mode III 39
Microstructure
flexural strength of gamma base titanium aluminides at room and elevated temperatures 69
the deformation characteristics of SiC particulate-reinforced aluminium alloy 6061 11
Modulated structure
on the coarsening of the modulated structure during aging of austenitic Fe–Mn–Al–C alloys prepared by the rapid solidification process 223
Morphologies
different morphologies of lamellar structure in a γ-phase titanium aluminide 103

Necks
on the formation of necks in an Al–13%Si eutectic alloy L5
Neutron diffraction
an examination of the mean stress contribution to the Bauschinger effect by neutron diffraction 215
neutron diffraction measurements of residual strains in offshore welds 209

Nickel
enthalpy measurements of undercooled melts by levitation calorimetry: the pure metals nickel, iron, vanadium and niobium 83
Niobium
enthalpy measurements of undercooled melts by levitation calorimetry: the pure metals nickel, iron, vanadium and niobium 83
Nitriding
laser nitriding of iron by excimer laser irradiation in air and N_2 gas L1

Offshore welds
neutron diffraction measurements of residual strains in offshore welds 209

Platelets
indentation and acoustic emission in filtration processed platelet reinforced ceramics 231
PMMA
predictive models for the creep behaviour of PMMA 251
Polymer composite
prediction of creep rupture of unidirectional carbon fiber reinforced polymer composite 237
Prediction model
prediction of creep rupture of unidirectional carbon fiber reinforced polymer composite 237
Predictive models
predictive models for the creep behaviour of PMMA 251

Rapid solidification
on the coarsening of the modulated structure during aging of austenitic Fe–Mn–Al–C alloys prepared by the rapid solidification process 223
Reinforcement orientation
effects of reinforcement orientation on the tensile response of metal-matrix composites 1
Residual strains
neutron diffraction measurements of residual strains in offshore welds 209
Roller die drawing
effect of hydrodynamic and roller die drawing on the texture of high carbon steel wires 97
Rolling textures
simulation of rolling textures of b.c.c. metals considering grain interactions and crystallographic slip on {110}, {112} and {123} planes 31

SiC particulates
the deformation characteristics of SiC particulate-reinforced aluminium alloy 6061 11
Simple shear
materials processing by simple shear 157
Simulations
simulation of rolling textures of b.c.c. metals considering grain interactions and crystallographic slip on {110}, {112} and {123} planes 31
Slip transfer
deformation mechanisms and slip transfer in a Ti–44Al–2Mo alloy 133
Strain
on the formation of necks in an Al–13%Si eutectic alloy L5
Strain hardening
an examination of the mean stress contribution to the Bauschinger effect by neutron diffraction 215

Tensile deformation
effect of the grain size on the rate of energy storage during the tensile deformation of an austenitic steel 49
Tensile properties
effect of aluminium on deformation mode and mechanical properties of austenitic Fe–Mn–Cr–Al–C alloys 147
Tensile response
effects of reinforcement orientation on the tensile response of metal-matrix composites 1
Texture
effect of hydrodynamic and roller die drawing on the texture of high carbon steel wires 97
Thermomechanical processing
dynamic recrystallization in a thermomechanically processed metal matrix composite 91
Three-point loading
interlaminar shear of woven fabric Kevlar–epoxy composites in three-point loading 113
Titanium alloy
deformation characteristics of IMI685 titanium alloy under β isothermal forging conditions 125
Titanium aluminides
different morphologies of lamellar structure in a γ-phase titanium aluminide 103
flexural strength of gamma base titanium aluminides at room and elevated temperatures 69
Ti–44Al–2Mo alloy
deformation mechanisms and slip transfer in a Ti–44Al–2Mo alloy 133
Toughness
fractal character of fracture surfaces and boundary values of toughness in a simple ceramic–ceramic system 109

Vanadium
enthalpy measurements of undercooled melts by levitation calorimetry: the pure metals nickel, iron, vanadium and niobium 83
